**BLANKET
AND ROLLER
MAINTENANCE**

Selected pressroom products, matched to particular printing applications makes the world of difference for creating superb print quality with beneficial press care.

Care for blankets and rollers is most beneficial for producing the best possible prints, and at the same time can help save unnecessary expenditure for premature blanket and roller replacement.

blanket and roller

PRIMA CALKLEEN

Formulated specifically for the removal of calcium deposits on rollers and blankets. Prima Calkleen is a heavy duty, ready-to-use gel.

Just apply to rollers and blankets, allow to penetrate for a few minutes then wash away calcium glazes.

Available in 600gm containers.
CODE PRCK/005

DEEP IMPACT

Versatile deep cleaning and deglazing paste can also be used as part of a quick two step colour change system. Can be used as part of a regular maintenance schedule of whenever rollers and blankets need to be refreshed and revitalised.

Available in 1kg containers.
