Baldwin UK Ltd is pleased to announce the strengthening of their UK distribution network with the appointment of Ultrachem as their UK exclusive distributor. Ultrachem in parallel with Baldwin UK and Baldwin Globaltec will supply and distribute the full range of Baldwin's cloth for blanket-cleaning systems.

With this appointment they will become the only other approved supplier in the UK along with Baldwin UK themselves of the patented "Baldwin Prepac", impregnated washcloth. Ultrachem will also supply selected equipment, from Baldwin's extensive product portfolio, such as water systems, IR dryers and cleaning systems, to the end customer market.

Baldwin UK Ltd and its sister company Baldwin Globaltec along with Ultrachem will continue to supply their existing customer bases and develop new business within the UK, Ireland and South Africa. Baldwin UK wishes to assure all their customers of total continuity of service and supply.

John Leek, Sales & Service Director, Baldwin UK Ltd. " We are very pleased to have this opportunity of working with Ultrachem as our UK distributor. They have a fantastic customer base and have an excellent reputation in our industry. We feel that they are ideally placed to take the Baldwin product range to a wider market.

Their extensive consumable portfolio will now be enhanced by the addition of "Baldwin Prepac" the original, patented, impregnated washcloth, developed by Baldwin. We feel that this extension to our supply chain will allow us to offer an improved and wider ranging service to our customers".
